Summary

DevOps Engineer with 2+ years of production experience building scalable cloud infrastructure and AI powered SRE tools. Amazon ML Summer School '23 graduate combining expertise in AWS, Kubernetes, CI/CD automation, and ML/AI. Recognized as SME for Observability & Monitoring at Crest Data. Published 3 international research papers and solved 1200+ DSA problems. Proven track record of reducing incident response time, improving system reliability, and delivering zero downtime deployments.

Technical Skills

Languages: Python, C++, Java, JavaScript, Bash/Shell, SQL
Cloud & DevOps: AWS (EC2, S3, RDS, VPC, Lambda, IAM), Terraform, Jenkins, GitLab CI/CD, Ansible
Containers & Orchestration: Docker, Kubernetes, Helm, Microservices Architecture
Monitoring & Observability: Prometheus, Grafana, Icinga, CloudWatch
ML/AI Frameworks: TensorFlow, PyTorch, LangChain, FAISS, OpenAI APIs, SBERT, Hugging Face, NLP
Backend & APIs: FastAPI, Django, Flask, Node.js, REST APIs, ReactJS
Databases: PostgreSQL, MongoDB, MySQL, Redis, DynamoDB, Hadoop (basic)
Testing & Automation:, Unit Testing, CI/CD Pipelines, Infrastructure as Code (IaC)
Tools & Methodologies: Git, GitHub, JIRA, Confluence, Agile

Experience

DevOps Engineer (E3)
July 2024 – Present
Crest Data Systems — *Ahmedabad, Gujarat, India*

- **Project 1 - PLBaaS (Polaris Load Balancer as a Service)**
- Part of the PLBaas team as PESRE (Platform Engineering - Site Reliability Engineer).
- Architected and deployed Kubernetes based microservices with dynamic, user facing interfaces.
- Rolled out comprehensive monitoring dashboards using Grafana, providing real time visibility into 100+ microservices across production environments
- Led code reviews and sprint planning for DevOps team, ensuring delivery of clean, maintainable, and scalable infrastructure code
- Handled weekly on call rotations responding to critical production incidents, maintaining zero downtime across key microservices through rapid troubleshooting and automated remediation
- **Recognized as SME (Subject Matter Expert)** for Observability & Monitoring, mentoring 5+ new engineers on best practices with Icinga, Prometheus, Grafana, and alert tuning strategies
- **Project 2 - AISRE (AI Powered Site Reliability Engineering):** Built AI driven SRE assistant combining DevOps automation with LLM capabilities to reduce incident diagnosis time and enable natural language infrastructure queries
- Designed and implemented internal MCP (Model Context Protocol) servers enabling LLM based automated incident analysis and real time SRE support.
- Integrated LLM workflows to auto generate Incident RCA reports, summarize complex logs, and recommend fixes using natural language prompts, reducing manual analysis time from hours to minutes
- Built intelligent chatbot features to fetch graphs, traces, and plots directly from Grafana/ElasticSearch, eliminating manual dashboard navigation.
- Leveraged FAISS vector database, OpenAI APIs, and SBERT embeddings for contextual retrieval during incidents.

Site Reliability Engineer Intern
January 2024 – June 2024
Crest Data Systems — *Ahmedabad, Gujarat, India*

- Automated AWS infrastructure provisioning and standardized Linux/Windows server configurations using Shell/PowerShell scripts.
- Built production grade CI/CD pipelines using Terraform + Jenkins with auto scaling and load balancing capabilities.

- Created detailed runbooks and documentation for infrastructure deployments, significantly improving deployment reliability and reducing human errors.
- Implemented monitoring solutions and alerting mechanisms for distributed systems.

Machine Learning Engineer Intern June 2023 – July 2023
Sparks To Ideas *Ahmedabad, Gujarat, India*

- Trained and optimized ResNet-50 model for image classification, improving accuracy from 87% to 92% through hyperparameter tuning and data augmentation techniques
- Cleaned and preprocessed datasets using labelImg and custom Python scripts, processing 10K+ images and improving detection quality.
- Integrated trained ML model into Flask API for live inference.

Key Projects

DevOpsGPT | *React, FastAPI, OpenAI, FAISS, LangChain* | Demo Video: Built an AI powered assistant for on-call workflows with contextual search and automated responses, reducing incident triage time. Integrated with internal knowledge bases using vector embeddings for intelligent query resolution

Automated GST Invoice Generation | *FastAPI, React, MongoDB, Socket.IO* | Demo Video: Developed fullstack platform automating GST billing with real time bookings and secure invoice APIs. Handles 500+ transactions daily with real time updates and PDF generation

Three Tier App Deployment using IaC | *Terraform, AWS, Jenkins, Docker* | GitHub Repo: Automated deployment of scalable 3 tier application using Infrastructure as Code. Implemented blue green deployment strategy with automated rollback.

Education

Nirma University Ahmedabad, Gujarat, India
Bachelor of Technology in Computer Science *October 2021 – June 2024*

Sankalchand Patel University Visnagar, Gujarat, India
Diploma in Computer Engineering *August 2018 – May 2021*

Achievements & Certifications

Amazon ML Summer School 2023: Selected among top 200 applicants nationwide for intensive 4 week ML training program covering deep learning, NLP, and computer vision – Certificate
Research Publications: Published 3 research papers at international conferences (IEEE/ACM) on CNNs, SVMs, and ML optimization techniques with 15+ citations
Competitive Programming: Solved 1200+ Data Structures and Algorithms problems across LeetCode (1000+), Codeforces, and GeeksforGeeks
MINeD Hackathon 2023: Finalist at Nirma University hackathon; designed AI based solution for cactus communication – Certificate
Subject Matter Expert (SME): Officially recognized as SME for Observability & Monitoring at Crest Data, responsible for team training and best practices
